SCALOPES

– results that count

CONGRATULATIONS to the Coordinator and all Partners on the successful completion of the ARTEMIS 'SCALOPES' project.

The aim to reduce energy consumption significantly and at the same time boost performance is a particularly important innovation enabler. Given the breadth of the project and its short duration, the results achieved have been impressive, with 63 deliverables with clear exploitation possibilities and innovations with impact. Individual and related companies can now take the knowledge gained in the project to help generate commercial products and services with real added value.

The project has ended but the pay-off has just begun!

ARTEMIS partners in SCALOPES

Small Medium Sized Enterprises: CoWare Belgium, TTI Norte Spain, DPControl S.r.l. Italy, ELVOX Costruzioni Elettroniche S.P.A. Italy, HPC Project France, ISA: Intelligent Sensing Anywhere S.A. Portugal, ISD: Integrated Systems Development S.A. sme Greece, ON2 Technologies Finland Oy Finland, Recore Systems the Netherlands, Scaleo Chip France, Target Compiler Technologies Belgium, Vista Silicon S.L. Spain

Large Enterprises: Barco Belgium, NXP Semiconductors Belgium, NXP Semiconductors the Netherlands (project leader), Philips Consumer Lifestyle Business Group the Netherlands, STEricsson Ltd United Kingdom, STEricsson NV Belgium, STMicroelectronics s.r.l Italy, Thales France
