

## **Update of the European Roadmap for Industrial Process Automation**

**Organized by ProcessIT.EU an ARTEMIS CoIE**

### **Workshop on input for Roadmap update, 7<sup>th</sup> of October 2015, Artemis Technology Conference, Torino, Italy**

**Dear all,**

The current version of the ProcessIT.EU Roadmap has been successfully adopted and widely used by European actors, and have inspired several project calls and proposals, as well as industrial activity in terms of product and service development. ProcessIT.EU has recently started the work with updating the Roadmap, in order to address new visions and emerging trends. Thus, in order to successfully update the Roadmap – we need your input.

You are hereby cordially invited to a workshop regarding the update of the **ProcessIT.EU Roadmap** at the ARTEMIS Technology Conference, Torino, on 7<sup>th</sup> of October 2015. The workshop will be held in the morning of the 7<sup>th</sup> of October (please see the ARTEMIS Technology Conference program for further details).

The ProcessIT.EU Roadmap has been used as a basis for discussions with EU and national authorities regarding the needs and future of the process industry. As the roadmap should be a living document to provide a basis for creation of innovative project ideas and proposals, it needs to be updated and renewed in order to reflect specific as well as global changes and challenges affecting the process industry. The current roadmap is available at <http://www.processit.eu/roadmap>

#### **Agenda**

- **European Roadmap for Industrial Process Automation:**
  - Presentation the current Roadmap
  - How is the Roadmap used today and by whom?
- Workshop on ideas for updating the Roadmap – general input, ideal concepts, R&D areas, etc. Your input is critical for the update of the Roadmap.

RSVP – please send an email to [john.lindstrom@ltu.se](mailto:john.lindstrom@ltu.se) to confirm your participation no later than 30<sup>th</sup> of September.

#### **Welcome**

Jonas Gustafsson, Olli Ventä, Jerker Delsing, Seppo Saari, Pär-Erik Martinsson and John Lindström
