

An opportunity you should not miss!

Date: 8 October 2015 (9:00-15:00)

Type: Workshop

Location: Starhotel Majestic, Turin / Room: Eleonora

Organizer: Road2CPS project (<http://www.road2cps.eu/>)

Are platforms a solution for our industrial competitiveness? How can they benefit from IoT and Big data?

This workshop has three major goals:

1. Align the work of different European initiatives to ensure the coherence of our results.
2. Align supply and demand. We know many solutions can be found in the market. But, are these solutions fulfilling real needs of customers? Are they suitable to promote the right innovation ecosystems?
3. Become part of one of the flagship communities that will define the future of CPS

The workshop will count on the knowledge and experience of experts in Open Platforms and architectures both horizontal (cross-sectorial) and vertical (domain-oriented), industrial players of data-intensive sectors and major representatives of initiatives like AIOTI and Big Data PPP.

Places are limited.

If you are interested in attending and based on the limited availability of places (max: 50) we encourage you to send your contact details (name, nationality, position and organization) to nuria.delama@atos.net. Further information on the event will be published shortly on the ROAD2CPS website.
